

## 3657X DVR UPGRADING INSTRUCTION

### **Caution:**

1. Upgrading has risk, so do **NOT** upgrade your DVR unless it has to;
2. Upgrading firmware must **MATCH** DVR original firmware;
3. Read upgrading instruction carefully before processing;
4. Please contact distributor or factory if you have any confusion, do **NOT** process upgrading if you have any questions;

### **Recognize Upgrading firmware:**

Usually, the upgrading firmware name is just like below:

Hi3515V100R003B010\_V090101V090101T110812T110812V090101-[36574V](#)-[VA129](#)

We have to pay attention to the [green](#) part and [orange](#) part.

The [green](#) part is to clarify DVR item No. which the upgrading firmware can be used;  
The [orange](#) part is firmware version; we have to pay attention to it because some one has version matching issue. If user wants to upgrade VA1.2.7, then its matching version is VA1.2.9B;

### **How to get new upgrading firmware?**

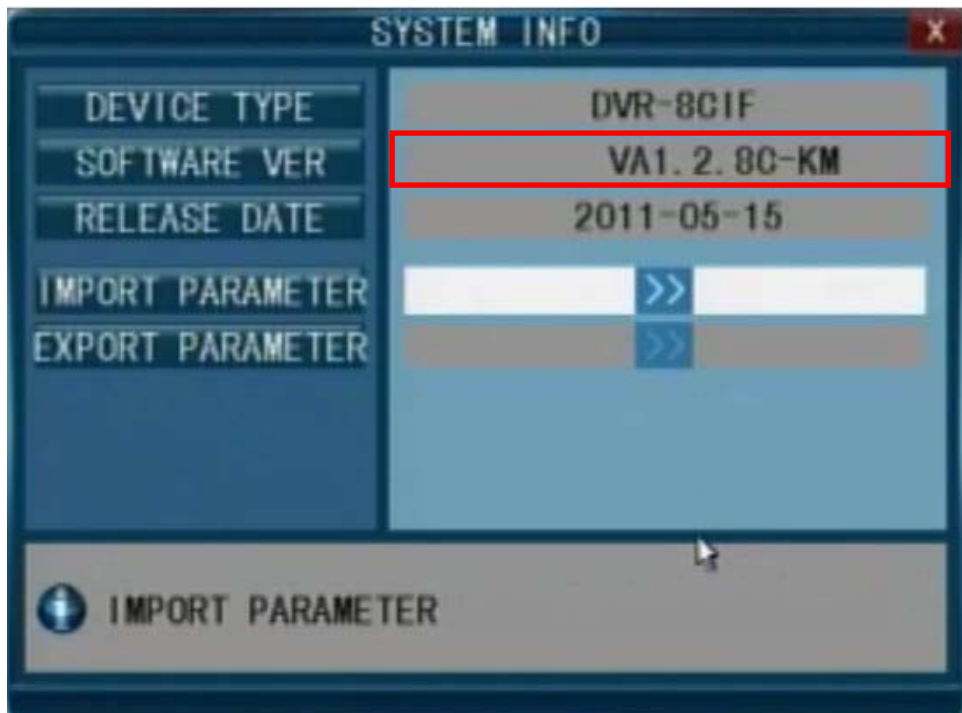

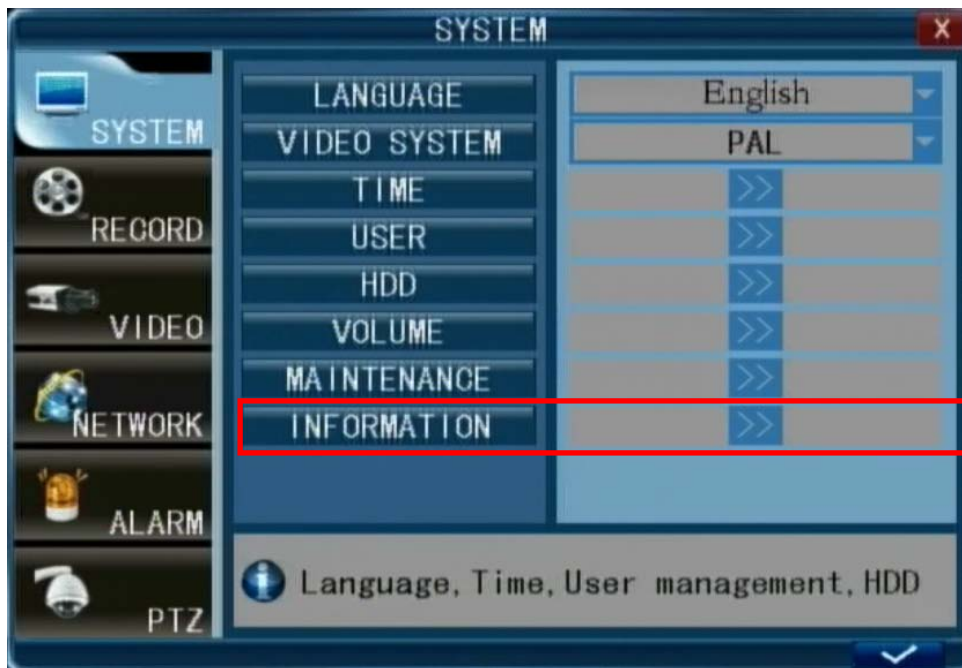

Ask distributor or factory to get the newest firmware;

### **How to find out DVR item No.?**

Check with distributor or factory;

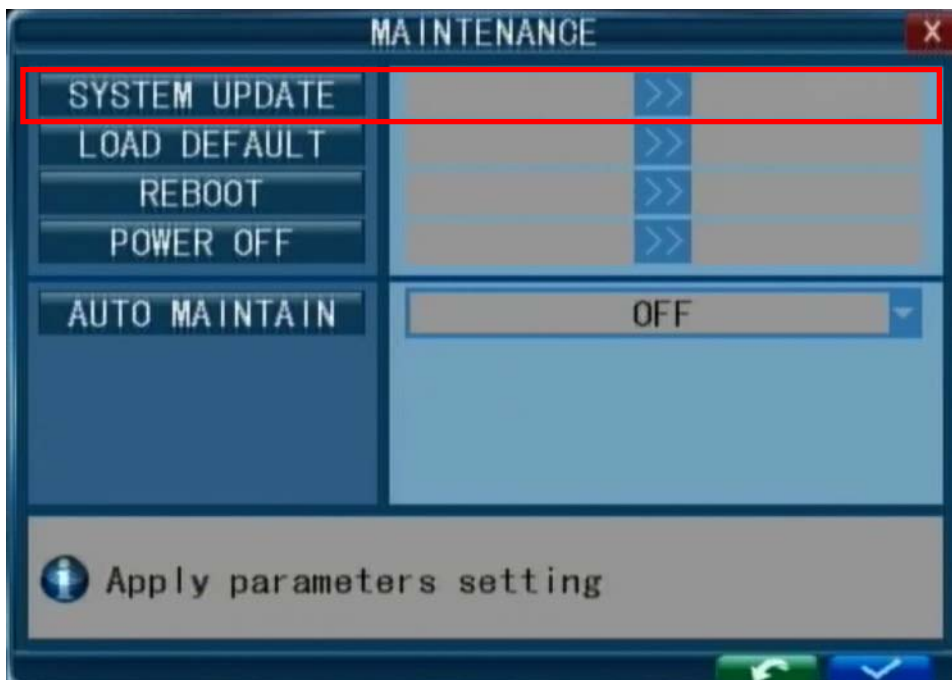

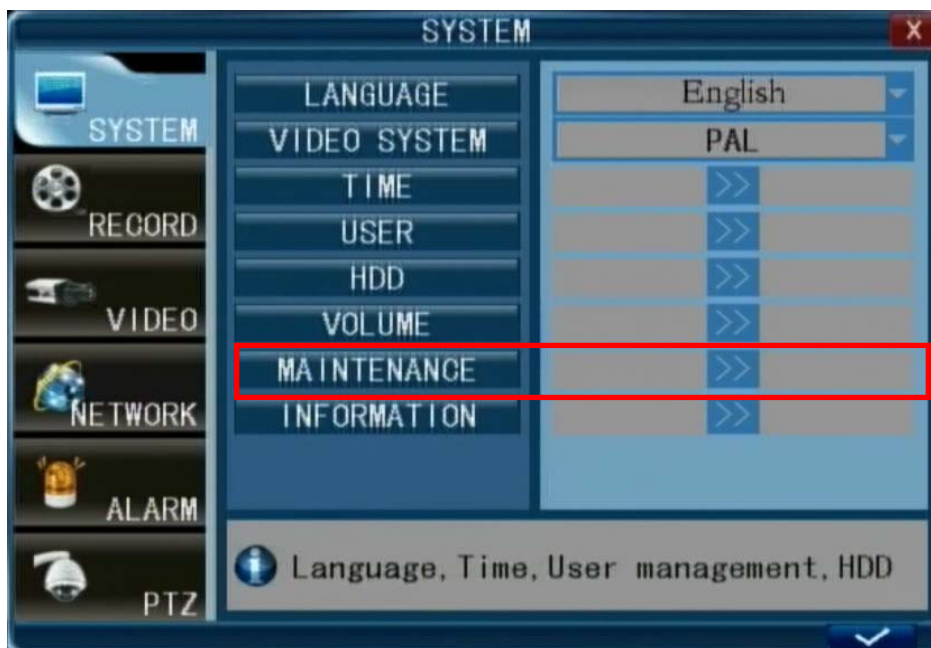

## How to find out DVR existing firmware version?

Login – System – Information

## Three Steps to upgrade system:

1. Create a new folder in USB / Flash Disk, folder name “dvrupgrade”
2. Save new version in the “dvrupgrade” folder and connect the USB / Flash disk to DVR
  - Usually, we will send user a “RAR” file includes the folder “dvrupgrade”, user just decompress the RAR file and copy the “dvrupgrade” folder into USB / Flash disk
3. Update system from main menu(see below graphical representation)

**Notice:**

1. **Do not process any operation when system updating**
2. **Do not cut off power supply when system updating**
3. **Do not move DVR when system updating**
4. **If updating failed or system is abnormal after updating, please contact us ASAP**
